New Flex Line Evaporators

All Flex line evaporators are designed to fit our Efficient LT201 and LT210 Cooling Units

Flex line is designed to stay flexible during installation, even if you don't get it right the first try

Flex Line can be coiled and uncoiled over 200 times

Flex line is designed for mobile applications including; Marine, RV and Trucking.

Flex line has been used in mobile commercial refrigeration for over 10 years

Flex line uses reusable quick couplings

Flex line is available on all Nova Kool evaporators and can be uncoiled from 2 ft (.8m) to 12ft (4.7m).

Lt 201 Cooling Unit specifications

12-24 vdc

Variable speed compressor

Low battery protection

Compressor runs on a 30° angle

Over sized Air cooled condenser for easy installation in all high ambient temperatures

Four year limited Flex line warranty

Mobile Refrigeration Specifically Designed
for
Marine, RV, Trucking, Solar and Off Grid applications
